

End cover injection machine (double-component adhesive)

Internal Product ID: ENFT-HDAF-017

Unit of Measurement	set
Brand	ENFT
Place of Origin	China
Certification	Manufactured Under Strict Quality Control
Min. Order Qty	1
Supply Ability	100 Sets/Month
Delivery Time	45 Days After Receipt of Advance Payment

Overview

End cover injection machine for gluing the upper and lower end caps of the paper core, suitable for products with iron end caps.

Description

Equipment function: Gluing the upper and lower end caps of the paper core
Equipment speed: 8 - 20 pieces/minute
Number of outgoing glue: 5 - 20
Equipment size: about 1280mm in length, about 1010mm in width, about 1740mm in height
Voltage specification: Voltage: 380V 50Hz; Total power: 2KW; Air pressure: >=0.6MPa
Equipment features:
Glue parameters are easy to adjust;
Using PLC control.
Remarks: Products with iron end caps
