

Inner and outer protective net spiral net winding machine (mesh belt)

Internal Product ID: ENFT-HDAF-018

Unit of Measurement	set
Brand	ENFT
Place of Origin	China
Certification	Manufactured Under Strict Quality Control
Min. Order Qty	1
Supply Ability	100 Sets/Month
Delivery Time	45 Days After Receipt of Advance Payment

Overview

Spiral net winding machine used for processing the inner and outer protective nets of air filters.

Description

Function: Used for processing the inner and outer protective nets of air filters;

Technical parameters:

Mesh winding diameter: 80~450mm, mesh width 109mm

Production speed: 80 meters/minute

Total power: 8KW

Mesh thickness: 0.5 - 0.8mm

Air pressure: 0.6MPa

Power supply: 220V, 50Hz

Overall dimensions: 1400*1200*1780

Remarks: The filter element and the inner and outer protective nets form a spiral notch. It can automatically adjust the diameter, angle, and cutting blade (no need to replace the mold).
