

Large air filter outer wall continuous spiral beater

Internal Product ID: ENFT-HDAF-022

Unit of Measurement	set
Brand	ENFT
Place of Origin	China
Certification	Manufactured Under Strict Quality Control
Min. Order Qty	1
Supply Ability	100 Sets/Month
Delivery Time	45 Days After Receipt of Advance Payment

Overview

Equipment using thermal glue and wire to fix the filter paper on the outer diameter of the air filter element in a spiral way.

Description

Function: Use thermal glue and wire to fix the filter paper on the outer diameter of the air filter element in a spiral way.

Diameter range: 100 - 3500mm

Maximum width of spiral net: 660mm

Hot melt glue machine: 30L

Total power: 8KW

Air pressure: 0.6MPa

Overall dimensions: 2100*880*1550mm (380kg)

Remarks: The filter element is wound with wire to fix the filter paper, and hot melt adhesive is applied to form a spiral backing plate.
