

Standard PU Glue Injection Machine

Internal Product ID: ENFT-LVAF-011

Unit of Measurement	台
Brand	ENFT
Place of Origin	China
Certification	Manufactured Under Strict Quality Control
Min. Order Qty	1 Set
Supply Ability	100 Sets/Month
Delivery Time	45 Days After Receipt of Advance Payment

Overview

Standard PU glue dispensing machine (moving table) for panel filter PU glue injection process.

Description

Process Name: PU Glue Injection Process

Equipment Parameters:

Panel Filter (Moving Table) Standard Configuration

1. Total discharge rate: 8-20 g/s, designed mixing ratio A:B = 100:20 to 60;
2. Maximum effective size of the square automatic pouring machine is 800X600 (mm); uses servo acceleration/deceleration to drive the ball screw, achieving the table's travel mode;
3. Total machine power: 6KW;
4. Power supply voltage: 380V, 50Hz;
5. Control adopts upper computer and motion control hybrid programming, where the metering pump is controlled by a servo motor;
6. Equipped with an all-in-one PC, massive data storage;
7. Foot switch control or automatic control of the glue injection process;
8. Simple one-key operation, reducing dependence on skilled workers;
9. Water cleaning, environmentally friendly and reduces cleaning costs;
10. Dimensions: 2000*1300*1700 (mm);
11. Weight: 470KG.
